Power Requirements & Setup

Please send an email including the equipment you plan to plug in, along with the amperage for each item. If your total power needs exceed 20 amps, you must use 220V power (includes more than 2 – 110 outlets). Vendors requiring 220V must send a clear photo of the plug at least 7 days prior to the event. All trailers must be equipped with GFI outlets.

Note that power will not be available until noon on Friday, and the generator will be turned off one hour after the event ends on Sunday.

Tent Anchoring Requirements

All tents must be anchored with a minimum of 80 lbs. per leg. Approved methods include:

- Two 5-gallon buckets per leg filled with sand (each ~50–60 lbs.) or water (each ~40–45 lbs.)
- Three sandbags per leg, securely fastened
- Three standard cinderblocks per leg (each ~35–40 lbs.)

It is recommended that all tents be anchored using ratchet straps or heavy-duty rope, angled downward to maintain proper tension and stability. Weights should be placed directly next to each tent leg to ensure secure placement. The use of stakes or any method involving pavement penetration is strictly prohibited.

Clean-Up and Early Exit Fee

Please include a separate check for \$150 as a Clean-up/Early Exit Fee. This check will not be cashed and will be returned at the end of the event. However, the Misquamicut Business Association (MBA) reserves the right to cash this check if you: Leave early on any night before closing, fail to show up, or do not properly clean your designated area.

Application Agreement to MBA Event Guidelines

I agree to be responsible for setting up and removing my exhibit, disposing of all trash properly, and using the designated dumpsters and recycling stations. All equipment and displays must be removed no later than Monday at midnight. The Misquamicut Business Association (MBA) reserves the right to decline any application or ask a vendor to leave the festival if any information has been misrepresented.

I acknowledge that Health, Fire, Electrical, and Building Inspectors will be on-site. I will have all required permits and follow all food safety procedures. Tents must comply with NFPA701 standards. Tents larger than 350 sq ft require a permit. Mobile food units must have a fire suppression system, and all wiring must meet code with no exposed wires.
